ALUMNEST

Bihar Government Partnership Pitch

A Bihar-first alumni infrastructure for jobs, mentorship, innovation, and student retention

Education | Employment | Startups | Women & Youth

What Bihar gets

- A structured alumni network across districts and institutions
- A lower-cost channel for jobs, internships, and referrals
- Mentorship support for students and young graduates
- A pipeline into startups, CSR, and local employer partnerships
- A measurable platform to support Bihar's talent retention goals

Built for Bihar's institutions, students, and alumni ecosystem

Why Bihar Should Back This Now

The state already has the ingredients: a large youth base, a growing startup policy environment, and a clear need for better education-to-employment links.

Literacy gap

Bihar's literacy rate is 63.82%, showing room to improve access to learning support and guidance.

Workforce gap

Bihar's LFPR is 55% versus 64.3% nationally, so the state needs stronger pathways into formal work.

Skills gap

ASER 2023 found that only about half of rural youth could read a basic English sentence and 43% could do simple math.

Startup signal

1,522 startups have been registered under Bihar Startup Policy, including 225 women-led startups.

Bihar-centric opportunity

- Convert alumni networks into employability support for students across Patna, Gaya, Bhagalpur, Muzaffarpur, and beyond.
- Use a trusted institution-led platform to reduce migration pressure by creating local opportunities first.
- Strengthen women's participation through mentorship, role models, and accessible network spaces.
- Support the state's startup and skill agenda with a ready-made digital layer for talent, referrals, and community.

What ALUMNEST Does for Bihar

A Bihar-first version of ALUMNEST connects institutions, alumni, students, and employers in one trusted system.

1. Connect

Private institution bases by batch
District and city chapters for Bihar alumni
Hindi + English access for easy adoption
Verified alumni and student profiles

2. Activate

Mentorship for students and fresh graduates
Internships, referrals, and hiring channels
Startup introductions and peer support
Events, reunions, and local networking

3. Track

Institution-level dashboards for participation
Engagement metrics for colleges and government
Talent pipeline insights by district
Impact reporting for programs and partnerships

Bihar-first features: district-wise chapters, women-focused mentorship, public-sector collaboration, and a local employer network.

Why the Bihar Government Should Partner

This is not only a platform investment. It is a low-cost digital public good that supports state priorities.

Jobs & employability	Alumni referrals and mentorship can open more internships and first jobs for Bihar students.
Retention of talent	When local opportunities are visible, students are more likely to build careers in Bihar instead of leaving.
Better institutions	Colleges gain a structured alumni engagement layer for placements, events, and fundraising.
Startup Bihar alignment	The platform can channel mentors, early customers, and local support into startup growth.
Women and youth focus	Targeted chapters can connect women students, first-generation learners, and district-level communities.

Bihar Rollout Plan

A phased rollout keeps the first launch practical and visible for the government.

Phase 1

1–3 months

Pilot in Patna with anchor colleges and alumni groups

Phase 2

4–9 months

Expand to Gaya, Bhagalpur, and Muzaffarpur

Phase 3

9–18 months

Add more districts and state-level employer partnerships

Pilot success metrics: institution adoption, alumni activation, job/referral activity, and district-level participation.

Department-Wise Use Cases

ALUMNEST can support multiple Bihar departments without creating a heavy government operating burden.

Education Department

- Alumni mentorship for colleges
- Campus-based engagement and placements
- Institution-level dashboards

Skill Development / Industries

- Internships and apprenticeships
- Startup introductions
- Employer and incubator network

Labour & Employment

- Referral pipeline into jobs
- District-wise talent visibility
- Migration-sensitive opportunity mapping

Women Empowerment / Youth

- Women-led alumni chapters
- Safe mentorship and role models
- First-job and first-startup support

Suggested 12-Month Impact Metrics

These are proposed targets for the Bihar pilot, so the government can monitor traction and impact clearly.

Metric	Target
Active institutions on board	5–10
Registered alumni and students	5,000+
Mentorship sessions completed	1,000+
Jobs / internships / referrals	500+
Startup intros / support actions	50+
Districts reached	3–5 in phase 1

Success should be measured not only by logins, but by real outcomes: mentorship, placements, internships, and startup activation.

What we need from Bihar Government

A small government push can turn ALUMNEST into a Bihar-wide network with public value.

Official endorsement	A state-level signal that encourages institutions to adopt the platform.
Pilot institutions	Access to a few anchor colleges and universities for a controlled launch.
Department nodal support	A single point of coordination for education, skill, and employment alignment.
State event visibility	Launch support through education and startup events to drive adoption.

Closing ask: Let Bihar be the first state where alumni infrastructure becomes a measurable public-growth tool.
